

# PEARL CYMBAL BOOM STAND / CYMBAL STAND C-1000 / B-1000

## Instruction Manual

Congratulations on your purchase!

To get optimum performance of your Cymbal Stand / Cymbal Boom Stand, please read this Instruction Manual before playing.

### WingLoc Quick Release Wing Nut

The WingLoc's quick release design makes attaching and removing cymbals quick and easy.

### WingLoc Removal

To remove the WingLoc, pull the wings apart and lift the WingLoc straight up as shown in (Fig. 1).

Fig. 1

### WingLoc Attachment

To attach, keep the wings open and place the WingLoc and the Upper Felt Washer over the Cymbal Post as shown in (Fig. 2).

Fig. 2

### WingLoc Adjustment

Snap either one of the wings upward as shown in (Fig. 3) and rotate the WingLoc until the desired tightness/looseness of the cymbal is achieved.

**Note:** Do not force the wings closed. If you feel resistance, rotate the WingLoc slightly to align the threads and try closing the wings again.

Fig. 3

### WingLoc Locked

Snap the other wing upward as shown in (Fig. 4) to lock the WingLoc in place.

**Note:** To prevent wear to the threads, do not tighten the WingLoc when both wings are in the locked position.

**Note:** Keep WingLocs in the locked position when transporting to avoid breakage or loss.

Fig. 4

### Reversible Seat Cup

The Seat Cup is reversible and can be set to Float, to allow cymbals to move freely, when set in the position shown in (Fig. 5A) or it can Lock, to prevent rattle in recording situations, when set in the position shown in (Fig. 5B).

### Caution

- ◆ When making any adjustment, use one hand to support and make the adjustment while using your other hand to control the tension of the wing nut or wing bolt to prevent the stand from falling and pinching fingers that may be in the way.
- ◆ When folding the tripod legs, be careful not to pinch your fingers between the legs and the stand.
- ◆ When handling tubular hardware do not put your fingers into the tubes to prevent injury to your fingers.
- ◆ For optimal stability, orient one leg in the same direction as the boom.
- ◆ Avoid impact to the upper OptiMount plate to prevent deformation of the plate.
- ◆ Test the stability of the stand before using. If necessary, readjust the length of the boom, the direction of the boom, or weight of the load until the stand is sufficiently stable.
